PERSONAL INVESTMENT MANAGERS

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so that you can make an informed decision about whether to invest.

McInroy & Wood Balanced Fund Personal Unit Class

This Fund is a UK authorised unit trust managed by McInroy & Wood Portfolios Limited (“the Manager”).

Objectives & Investment Policy

The investment objective of the Balanced Fund is to maximise the total return to unitholders, by preserving and growing the real value of investors’ capital and income, placing an equal emphasis on the generation of income and on capital growth. Real value is defined as the value of capital and income after adjusting for the impact of inflation. The UK Retail Prices Index is the measure of inflation used by the Manager. The investment should be held for a minimum period of 3 years. Total return is defined as capital appreciation, if any, plus income received, and does not imply that a positive return will be consistently achieved over this or any other time period. Investors should be aware that their capital is at risk.

The Fund has discretion to invest in quoted securities and fixed-interest bonds in any geographical areas and any economic sectors.

The Manager has the power to invest more than 35% in value of the scheme property of the Balanced Fund in government and other public securities. This power is restricted to bonds or other securities issued by the Governments of the United Kingdom or the United States of America.

Essential Features of the Fund

- Units can be bought and sold daily on a forward price basis.
- Unit prices are based on the value of underlying net assets at 12.00 midday (“the Valuation Point”).
- Minimum initial and subsequent investment is £1,000 and minimum monthly regular investment is £100.
- Income from the Fund may be distributed or added to the value of your investment.

Please note that the Fund has not been registered under the applicable US acts and may not be sold in the US or to a US person if it were to contravene US securities laws.

Risk & Reward Profile

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

- This indicator shows how much a fund’s price has risen and fallen in the past and therefore how much its returns have varied: it is a measure of the fund’s volatility. The higher the past volatility, the higher the number on the scale. The lowest number on the scale does not mean that a fund is risk free.

- The fund's classification reflects the nature of its underlying investments which include the risks noted below.
- This indicator is based on historical data. It should not be used as an indicator of the fund's future risk profile. The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- The Fund has no capital guarantees: the value of units, and the income from them, may go down as well as up. Changes in the rates of currency exchange may cause the value of units to fluctuate.
- When you cash in all or part of your investment you may get back less than you put in.
- Fixed-interest securities are affected by trends in interest rates & inflation. If interest rates go up then the value of capital may fall and vice versa. Inflation may also decrease the real value of capital. The value of a fixed-interest security is also affected by its credit rating.
- Investment in emerging markets can be subject to risks not normally associated with developed markets and vice versa.
- More information about risk may be found in the Full Prospectus under "Risk Warnings".

Charges

The charges you pay are used to pay the cost of running the Fund. These charges reduce the potential growth of your investment.
