

## Fund objectives, policy and target market

The investment objective of the Smaller Companies Fund is to grow the real value of investors' capital and income. Investments will be in global smaller companies, which do not form part of the leading market indices. An equal emphasis will be placed on the generation of income and on capital growth. Real value is defined as the value of capital and income after adjusting for the impact of inflation (UK Retail Price Index 'RPI').

The fund invests at least 50 per cent in shares of smaller companies. The fund may invest in any geographical area and any economic sector.

Investors should intend to invest for a minimum of 3 years, and accept that the value of their investment can rise and fall significantly due to the nature of the underlying investments in the fund. The fund will however allow ready access to their investment. The fund is only suitable for investors who are prepared to accept the risk of some loss of their capital.

## A Word of Caution

You should remember that the price of units and the income from them may go down as well as up. Gains are not necessarily achieved in the short term. Exchange rate fluctuations may also cause the value of an investment to rise and fall. Some of the fund's investments are in the emerging markets which can be subject to risks not normally associated with developed markets. More information about risk may be found in the full Prospectus (available on our website) under "Risk Warnings".

This factsheet should be read in conjunction with the relevant Key Investor Information Document. It has been updated to reflect the launch of accumulation units in the fund. Where indicated, the fund data in the 'General information' section shows the position on 2nd May 2024, the date accumulation units were launched. All other information is as at 31st March 2024.
