

Fund objectives, policy and target market

The investment objective of the Income Fund is to preserve and to grow the real value of investors' capital and income, with an emphasis on the generation of income. Real value is defined as the value of capital and income after adjusting for the impact of inflation (UK Retail Price Index 'RPI').

The fund invests at least 50 per cent in a diversified range of international equities, fixed-interest securities and, at times, gold (via physically backed exchange traded commodities). The fund may invest in any geographical area and any economic sector. The fund can invest more than 35 per cent in government and other public securities issued by the Governments of the United Kingdom or the United States of America.

Investors should intend to invest for a minimum of 3 years. The fund will however allow ready access to their investment. The fund is only suitable for investors who are prepared to accept the risk of some loss of their capital.

1. Historic dividend yield reflects distributions declared over the past 12 months as a percentage of the unit price. You should remember that the price of units and the income from them may go down as well as up. Past performance should not be used as a guide to future performance.

2. See Prospectus for non-business days

The Investment Adviser's approach to responsible investing

McInroy & Wood Limited is the investment adviser (the 'Adviser') of the fund. The Adviser is committed to responsible investing. Details of the approach it takes can be found in its Statement on responsible investing: www.mcinroy-wood.co.uk/about-us/statement-on-responsible-investing.

Performance record

You can assess how well the fund has performed against its objectives to grow the real value of investors' capital and income by referring to the change in the RPI over the same period.

Enquiries

If you invest through a platform or nominee, you will not receive regular communications from McInroy & Wood. Please get in touch with us if you would wish to receive these.

A Word of Caution

You should remember that the price of units and the income from them may go down as well as up. Gains are not necessarily achieved in the short term. Exchange rate fluctuations may also cause the value of an investment to rise and fall. Some of the fund's investments are in the emerging markets which can be subject to risks not normally associated with developed markets. More information about risk may be found in the full Prospectus (available on our website) under "Risk Warnings".

This factsheet should be read in conjunction with the relevant Key Investor Information Document, available on our website. All information is accurate as at 30th June 2024.
