

Fund objectives, policy and target market

The investment objective of the Income Fund is to preserve and to grow the real value of investors' capital and income, with an emphasis on the generation of income.

The fund holds a portfolio of direct investments in a diversified range of international equities and fixed-interest securities. The fund may invest in any geographical area and any economic sector. The Manager has the power to invest more than 35 per cent in value of the scheme property of the Income Fund in government and other public securities. This power is restricted to bonds or other securities issued by the Governments of the United Kingdom or the United States of America. In accordance with the firm's ethical principles, the fund has no investments in tobacco companies or companies directly involved in the development of arms.

Income prospects in current market conditions

Many companies have cut or cancelled dividends, as operations have been significantly disrupted by the coronavirus outbreak. As a result, distributions from the Income Fund over the forthcoming year are likely to be significantly lower than in the past.

A Word of Caution

You should remember that the price of units and the income from them may go down as well as up. Gains are not necessarily achieved in the short term. Exchange rate fluctuations may also cause the value of an investment to rise and fall. Some of the fund's investments are in the emerging markets which can be subject to risks not normally associated with developed markets. More information about risk may be found in the full Prospectus under "Risk Warnings".

This sheet should be read in conjunction with the relevant Key Investor Information Document, available on our website. Unless otherwise stated, all information in this factsheet is supplied by McInroy & Wood as at 30th September 2020.
