

Fund objectives, policy and target market

The investment objective of the Income Fund is to preserve and to grow the real value of investors' capital and income, with an emphasis on the generation of income. The Manager has the power to invest more than 35 per cent in value of the scheme property of the Income Fund in government and other public securities. This power is restricted to bonds or other securities issued by the Governments of the United Kingdom or the United States of America.

The fund holds a portfolio of direct investments in a diversified range of international equities and fixed-interest securities. The fund may invest in any geographical area and any economic sector. In accordance with the firm's ethical principles, the fund has no investments in tobacco companies or companies directly involved in the development of arms.

Whilst the fund is suitable for mass market distribution it is not suitable for investors who require full capital protection. Investors should have a medium to long-term investment horizon (3-5 years) and accept that the value of their investment will fluctuate. The fund will however allow ready access to the investment.

A Word of Caution

You should remember that the price of units and the income from them may go down as well as up. Gains are not necessarily achieved in the short term. Exchange rate fluctuations may also cause the value of an investment to rise and fall. Some of the fund's investments are in the emerging markets which can be subject to risks not normally associated with developed markets. More information about risk may be found in the full Prospectus under "Risk Warnings".

This sheet should be read in conjunction with the relevant Key Investor Information Document, available on our website.

Unless otherwise stated, all information in this factsheet is supplied by McInroy & Wood as at 31st December 2018.
